EXCEED EXCELLENCE!

Created in 1984, ELCOS is a global company driven by research and innovation. With our historical anchorage, our products serve diversified markets worldwide with one main aim to improve quality and customer performance.

It is through research and innovation that the leadership positions of our businesses are strengthened. We have been focused on skin care packaging such as airless bottles and jars.

ELCOS has sites in 3 countries (Korea, China, and USA)
- Korea: Headquarter / Factory
- China: Offices in Suzhou, Shanghai, Guangzhou / Factory
- USA: New Jersey office

ELCOS wants to contribute to a sustainable future and has embedded this by achieving ISO 9001 certification. All of our products and components are manufactured in compliance to global environmental policies and regulations, promoting and being a strong advocate to environmental management. We act responsibly as an integral part of society. In doing so, we strictly adhere to our compliance standards. And we never compromise on polluting in everything we do.

ELCOS wants to align our business even more with our customers' needs and contribute to their success with excellent quality, cost effective products and services. Customer demand is the core of our corporate development. Thus, customer satisfaction is the benchmark for assessment of our success and we always aim to maximize customers' interests by developing innovative ideas and designs that fit the needs of today's demanding market.

For more information about ELCOS, please visit our website at www.elcosgroup.com

Company
Introduction

FROM NATURE TO INNOVATION

Elcos knows how important it is to reduce our impact on the environment which is why we have innovative, new eco-friendly alternatives to our traditional packaging materials.

Clean beauty, green cosmetics, sustainable skincare, and eco-friendly personal care products will become increasingly important in the future. They are no longer a fringe division of the cosmetics industry.

The approach to environmental friendliness of beauty product packaging has been a big challenge for us. However, we have developed and innovated various kinds of environmentally friendly packaging. (recyclable PET/PETG/PP/PE bottles and pumps, glass, refillable containers, etc.)

Elcos is also working with a greater number of consumers and brands that are embracing a cleaner, greener, and eco-friendly approach to beauty.

Elcos is taking a deep dive in the world of recyclable skincare and beauty. We present sustainable packaging options for cosmetic industry and the environment.

PET / PETG	Recyclable
PP	Recyclable
PE	Recyclable
GLASS	Recyclable
PMMA	Non-Recyclable
Composite Material (Assembled Pump)	Non-Recyclable
SAN	Non-Recyclable
ABS	Non-Recyclable

Even if the materials are recyclable, they may become non-recyclable based on added decorations or composite materials.
